- d) Examine the advantages and disadvantages of using the telephone as a medium of communication. 04 L2 02 9,11

Unit – II

4. a) **Read the following passage and answer the questions:**

Integrating Humanities into STEM Education

In the ever-evolving landscape of engineering and technology, the demand for professionals who possess not only technical expertise but also a well-rounded set of soft skills is growing. As the world becomes more interconnected and complex, the integration of humanities into STEM (Science, Technology, Engineering, and Mathematics) education is becoming a vital trend. This approach, which blends technical knowledge with the insights provided by the humanities, is preparing future engineers to navigate the challenges of the 21st century with greater agility and effectiveness.

Traditionally, engineering education has focused heavily on technical subjects like mathematics, physics, and computer science. While these disciplines remain crucial, there's a growing recognition that engineers also need skills that fall outside the typical STEM curriculum. These skills, often referred to as "soft skills," include communication, critical thinking, teamwork, and ethical reasoning. Humanities courses, which encompass subjects like philosophy, sociology, and literature, provide the ideal platform for developing these abilities.

- b) 'Headache is essential to maintain human relationship in working order.' Prove this statement with your understanding of Narayan's style of writing. 04 L4 02 1,4,7,8
