December 2025

CV2503 -1 – ENVIRONMENTAL IMPACT ASSESSMENT

(Open Elective)

Duration: 3 Hours

Max. Marks: 100

Note:

Part – A: Multiple Choice Questions: Answer all **Twenty** questions in the **OMR Sheet** provided. Each question carries equal marks.

Part – B: Descriptive Answer Questions: Answer **Five full** questions choosing **Two full** questions from **Unit – I & Unit – II** each and **One full** question from **Unit – III**.

PART - A: MULTIPLE CHOICE QUESTIONS**20 Marks**

1. **What is the main purpose of the screening stage in EIA?**
A) To predict the economic viability of a project
B) To determine whether a full EIA is required
C) To evaluate alternative project locations
D) To engage public participation
2. **Which of the following EIA methodologies uses a simple checklist to identify potential environmental impacts?**
A) Matrices
B) Checklists
C) Networks
D) Adhoc
3. **Which EIA methodology is best suited for showing the relationship between cause and effect?**
A) Checklists
B) Matrices
C) Network diagrams
D) Overlay maps
4. **Who typically conducts the Environmental Impact Assessment (EIA)?**
A) project developer
B) Government agencies
C) Independent environmental consultants
D) Local communities
5. **What is the main role of stakeholders in EIA?**
A) To delay the project approval process
B) To contribute insights and concerns regarding environmental and social impacts
C) To replace environmental consultants
D) To promote only economic benefits of the project
6. **How does stakeholder involvement improve the EIA process?**
A) By reducing transparency
B) By focusing only on legal approvals
C) By eliminating the need for environmental monitoring
D) By helping identify potential environmental and social impacts early
7. **How can stakeholders contribute to the monitoring phase of an EIA?**
A) By participating in environmental audits and reporting issues
B) By ignoring environmental concerns
C) By avoiding participation in project discussions
D) By only supporting economic interests

8. **What is the impact of excluding stakeholders from the EIA process?**
A) Increased environmental risks and potential conflicts
B) Improved transparency
C) Faster project approval without consequences
D) Strengthened environmental protection
9. **Why is public participation considered essential in the EIA process?**
A) It allows project proponents to ignore environmental issues
B) It gives citizens a voice in decisions that affect them
C) It prevents all development projects from being approved
D) It ensures decisions are made without consulting the public
10. **Why do some governments and corporations resist public participation in EIA?**
A) It can lead to delays and increased costs
B) It makes project approval faster
C) It removes the need for environmental assessments
D) It eliminates the need for stakeholder engagement
11. **Which of the following is NOT a constraint to public participation in EIA?**
A) Limited financial resources for participation
B) Language and cultural barriers
C) High levels of public awareness and engagement
D) Political interference
12. **How can public participation in EIA be improved?**
A) By keeping information confidential
B) By increasing public access to environmental information
C) By reducing transparency in decision-making
D) By excluding marginalized communities
13. **What is the primary goal of predicting environmental parameters in EIA?**
A) To estimate potential environmental impacts
B) To approve all development projects
C) To stop all industrial activities
D) To increase economic growth
14. **What is the significance of baseline data in EIA?**
A) It provides a reference point to compare future impacts
B) It is used to reject proposed projects
C) It only focuses on social aspects
D) It is unnecessary for impact assessment
15. **Which of the following is a major challenge in environmental prediction for EIA?**
A) Lack of accurate data
B) Abundance of financial resources
C) No environmental concerns
D) Guaranteed accuracy of predictions
16. **What is the role of risk assessment in EIA?**
A) To estimate the probability and severity of adverse impacts
B) To approve projects without analysis
C) To ensure project profitability
D) To focus only on economic development
17. **Which international standard is most commonly used for EMS certification?**
A) ISO 9001
B) ISO 14001
C) OHSAS 18001
D) ISO 27001
18. **An environmental aspect refers to:**
A) Any element of an organization's activities that can impact the environment
B) A legal requirement for an organization
C) A financial statement for an organization
D) A type of waste material

19. Which of the following is an example of pollution prevention under EMS?
- A) Increasing the use of single-use plastics B) Implementing cleaner production technologies
- C) Disposing of hazardous waste without treatment D) Burning all waste materials
20. An organization using ISO 14001 should:
- A) Disregard legal environmental regulations B) Continuously improve its EMS
- C) Ignore environmental impacts D) Focus only on profit-making

PART - B: DESCRIPTIVE ANSWER QUESTIONS

Unit – I		Marks	BT*	CO*	PO*
1.	a) Explain the relationship between EA, EIS and FONSI, ROD.	8	L*2	2	1,2,3
	b) Differentiate between Comprehensive EIA and Rapid EIA	8	L2	1	1,2
2.	a) Explain any three types of checklist methods	8	L2	2	1,2,3
	b) Discuss institutional framework for pollution prevention.	8	L2	1	1,2
3.	a) Explain the procedure of EIA.	8	L2	1	1,2
	b) Explain the range of stake holders involved in EIA	8	L2	2	1,2,3
Unit – II					
4.	a) Explain Artesian ladder of participation.	8	L2	4	1,2
	b) Explain impact assessment and prediction of Soil and Ground water attributes	8	L2	3	1,2
5.	a) Discuss environmental clearance procedure in India.	8	L2	3	1,2
	b) Explain the constraints that effects meaningful public participation.	8	L2	4	1,2
6.	a) Briefly introduce the role and contribution of public involvement in the EIA process	8	L2	3	1,2
	b) Explain briefly assessment and prediction of river water attributes.	8	L2	4	1,2
Unit – III					
7.	a) Outline the EIA aspects of following project Reservoir and other impoundments designed for the holding back or permanent storage of water.	8	L3	5	1,2
	b) Explain the importance of Environmental Management System.	8	L2	5	1,2
8.	a) What is fault-free analysis in the context of EIA, and why is it important for ensuring the accuracy and reliability of impact assessments?	8	L2	5	1,2,
	b) What are some best practices for incorporating Life Cycle Assessment into the EIA process to ensure its effectiveness and relevance in decision-making?	8	L2	5	1,2,

BT* Bloom's Taxonomy, L* Level; CO* Course Outcome; PO* Program Outcome
