

14. What is the term for a brick laid with its shortest end exposed on the face of the wall?
 A) Stretcher B) Header
 C) Soldier D) Queen closer
15. What is the term for the curved part of an arch between the springing line and the keystone?
 A) Extrados B) Intrados
 C) Haunch D) Spandril
16. A canopy is often supported by:
 A) Reinforced concrete slabs B) Load-bearing walls
 C) Horizontal beams D) Columns
17. Which feature is important for industrial flooring in areas prone to high impacts and heavy machinery?
 A) High gloss finish B) Light color
 C) Impact resistance D) Soft texture
18. What is the term for the highest point of a sloped roof where two roof planes meet?
 A) Ridge B) Valley
 C) Eaves D) Soffit
19. Which components of a staircase is the flat platform at the top or bottom of a flight of stairs?
 A) Riser B) Tread
 C) Nosing D) Landing
20. Which material is most commonly used for the construction of collapsible doors?
 A) Wood B) Glass
 C) Steel D) Plastic

PART - B: DESCRIPTIVE ANSWER QUESTIONS

Unit – I		Marks	BT*	CO*	PO*
1.	a) Explain geological classification of rocks with suitable example.	8	L*2	1	1,2
	b) Explain the different methods of artificial seasoning in timber.	8	L2	2	1,2
2.	a) Compare Clamp and Kiln burning involved in the manufacture of bricks.	8	L2	1	1,2
	b) Explain any 4 types of cement available, and what are their applications in construction?	8	L2	2	1,2
3.	a) Explain any 4 types of finishes given to stones with a neat sketch.	8	L2	1	1,2
	b) Compare the uses of aluminum and mild steel in construction.	8	L2	2	1,2
Unit – II					
4.	a) Discuss the importance of site investigation in ensuring the safety and longevity of a structure.	8	L2	3	1,2
	b) Compare rubble masonry and ashlar masonry in construction.	8	L2	4	1,2
5.	a) Explain the plate load test method for determining the bearing capacity of soil. (Gravity loading method)	8	L2	3	1,2
	b) Classify with a neat sketch the different types of arches based on their shape in construction. (any 4)	8	L2	4	1,2
6.	a) Explain the situations in which pile foundations are necessary. How do soil conditions affect the choice of friction or load-bearing piles?	8	L2	3	1,2
	b) Discuss the advantages and disadvantages of using English bond compared to Flemish bond in brick masonry construction.	8	L2	4	1,2
Unit – III					
7.	a) Explain the different types of flooring materials commonly used in construction.	8	L2	5	1,2
	b) Explain the process of applying paint to new surfaces. What preparatory steps are necessary before painting?	8	L2	5	1,2
8.	a) Compare asbestos cement sheets with galvanized iron sheets as roofing materials in terms of durability and cost.	8	L2	5	1,2
	b) Explain the essential requirements of a good staircase in terms of safety, comfort, and space utilization.	8	L2	5	1,2
