Fifth Semester B.Tech (CBCS) Degree Examinations

December 2024

IS3202-1 – ROBOTIC PROCESS AUTOMATION DESIGN AND DEVELOPMENT

(For IS)

Duration: 3 Hours

Max. Marks: 100

Note:

Part – A: Multiple Choice Questions: Answer all **Twenty** questions in the **OMR Sheet** provided. Each question carries equal marks.

Part – B: Descriptive Answer Questions: Answer **Five full** questions choosing **Two full** questions from **Unit – I & Unit – II each** and **One full** question from **Unit – III**.

PART - A: MULTIPLE CHOICE QUESTIONS**20 Marks**

1. **What happens when the license for the Community Edition expires?**
A) It can be renewed freely, by request. B) A paid license has to be acquired.
C) The license for Community Edition is unlimited. D) The software will continue to work but with limited functionality
2. **Which of the following is not an RPA technology?**
A) GUI Automation B) b) Screen Scraping
C) c) SAP Automation D) d) Machine learning
3. **The AS IS process is documented in which document(s)?**
A) Only in the SDD B) Only in ADD
C) Only in the PDD D) Hard disk
4. **Which activity group do you have available for sending emails?**
A) IMAP B) SMTP
C) POP3 D) FTP
5. **Which of the following best describes the function of hypertext?**
A) Formats text within web pages. B) Links and cross-references web pages and HTML documents between them.
C) Enables sharing of files from one computer to another D) Executes scripts and programs within web browsers
6. **In which stage is the PDD drafted?**
A) Analysis B) Development
C) User Acceptance Testing D) Design
7. **Who coined the term Automation?**
A) Henry Ford B) Mark Austin
C) DS Harder D) Graham Bell
8. **What is the best collection type to store a group of variables with their names?**
A) String B) Integer
C) List D) Dictionary
9. **Which of the following actions is an action under both automatic and manual recording?**
A) Type B) Right click
C) Right click D) Hover
10. **Which of the following best defines a partial selector?**
A) Contains all the required elements to identify an UI element, including the top level window. B) Can change certain attribute values based on the selected variable.
C) It's generated by the Desktop Recorder and does not contain information about the top level window. D) It identifies multiple UI elements at once.

11. Which of the following is used to pass data from one workflow file to another in UiPath Studio?
 A) Namespaces B) Variables
 C) Arguments D) Annotations
12. Which types of selector are best suited for wildcard?
 A) Partial selectors. B) Full selectors.
 C) Static selectors D) Dynamic selectors.
13. How does the Send Window Messages input method work?
 A) It uses the drivers of the keyboard and the mouse to simulate the action. B) It replays the messages that the application receives when the mouse or keyboard is used.
 C) It identifies the target element and changes its value directly. D) It directly modifies the application's internal state without using the message queue.
14. The best way to open an application in virtual environment is.....
 A) By assigning Hot key to the application B) By manually navigating through the file system every time
 C) By restarting the virtual environment every time D) By opening the virtual box in another application
15. Which activity can be used to merge data table? a) b) c)
 A) Join Data table B) Merge Data table
 C) Filter data table D) Sort Data Table
16. What is a common use case for email automation in RPA?
 A) Sending out daily reports B) Generating invoices
 C) Creating new user accounts D) Scheduling meetings
17. Which of the following is an optional Block in Try Catch activity?
 A) Try Block B) Throw
 C) Catch Block D) Finally
18. Which of the following is a state in Re-Framework?
 A) Start State B) Send Transaction
 C) Process Transaction D) Validate Data
19. What is Team Foundation Server (TFS)?
 A) TFS is a process to load and initialize all applications. B) TFS provides source code management.
 C) TFS is a way to store, read, and modify project configuration data. D) TFS is a tool for automating user interface testing.
20. Which of the following cannot be edited while the robot is busy in execution?
 A) Username B) Machine
 C) Type D) Software

PART - B: DESCRIPTIVE ANSWER QUESTIONS

Unit – I		Marks	BT*	CO*	PO*
1.	a) What is automation debugging? And also outline the different debugging activities and debugging options.	8	L*2	2	1
	b) What is Main View in UiPath studio and also explain the different panels listed in the main view.	8	L2	2	1
2.	a) Discuss the features of UiPath studio? Explain the basic architecture of UiPath.	8	L2	1	1
	b) What is RPA robot? Explain the different types of RPA robots and also list the benefits and challenges in RPA.	8	L2	1	1
3.	a) Explain the steps involved in developing an RPA project and also give the control flow of RPA.	6	L2	2	1
	b) What is Context menu? Explain the different options associated with it.	6	L2	1	1

- c) Differentiate between Waterfall Vs Agile model.

4 L2 2 1

Unit – II

4. a) What is UiPath studio recording? Compare and contrast the different recording types and also explain the use of automatic recording activities.
b) Explain the different types of control flow statements along with an example used in UiPath.
5. a) Differentiate data query and data manipulation and also summarize the basic operations of data manipulation.
b) What is static and dynamic user interface? Explain the selector editor and selector status in UiPath.
6. a) Outline in detail the working of data scraping in UiPath Studio.
b) Explain the various Manual Recording Activities.

8 L2 4 2
8 L2 3 1
8 L2 4 1
8 L2 3 1
8 L2 3 1
8 L2 3 1

Unit – III

7. a) Explain the use of UiPath studio activities in sending an Email and also summarize the need for Email Automation.
b) What is Robotic Enterprise framework? Explain the different states in RE- framework.
8. a) What is Excel and Data table? Explain extracting data from data table in UiPath.
b) What is a robot? List the different types of robots in orchestrator. Explain controlling and deploying of robots using orchestrator in UiPath.

8 L2 5 1
8 L2 5 1
8 L2 5 1
8 L2 5 1

BT* Bloom's Taxonomy, L* Level; CO* Course Outcome; PO* Program Outcome
