

**NMAM INSTITUTE OF TECHNOLOGY, NITTE***(An Autonomous Institution affiliated to VTU, Belagavi)***Sixth Semester B.E. (CSE) (Credit System) Degree Examinations**

May - June 2023

**20CSM103 - FRONT-END DEVELOPMENT WITH REACT**

Duration: 3 Hours

Max. Marks: 100

*Note: Answer **Five full** questions choosing **Two full** questions from **Unit – I & Unit – II each** and **One full** question from **Unit – III**.*

| Unit – I   |                                                                                                                                                                                                                                                                                                                                   | Marks | BT* | CO* | PO* |
|------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|-----|-----|-----|
| 1. a)      | Explain the following acronym. i) RSS ii) SOAP and iii) DTD                                                                                                                                                                                                                                                                       | 10    | L*1 | 2   | 1   |
| b)         | What is HTTP? What are HTTP requests and responses? Write the syntax for the same.                                                                                                                                                                                                                                                | 10    | L2  | 2   | 1   |
| 2. a)      | What do you mean by meta tags? Show their meaning and use examples. Also, show how can following be achieved with the help of Metadata?<br>i) Stop the page from being listed. ii) Set an expiration date.<br>iii) Stop the browser from caching a page. iv) Give a context for a date so that it can take the format DD- MM-YYYY | 10    | L2  | 2   | 1   |
| b)         | What do you mean by "class" and "id" in CSS? Explain with an Example.                                                                                                                                                                                                                                                             | 10    | L2  | 2   | 1   |
| 3. a)      | Write HTML and CSS code for the following: (i) set the background color for the active link states to "yellow". (ii) Set the list style for unordered lists to "square". (iii) Set "paper.gif" as the background of the image.                                                                                                    | 10    | L1  | 2   | 1,2 |
| b)         | Write a JavaScript program that read number and checks whether that number is prime or n.                                                                                                                                                                                                                                         | 10    | L1  | 2   | 1,2 |
| Unit – II  |                                                                                                                                                                                                                                                                                                                                   |       |     |     |     |
| 4. a)      | Explain the key components of the XML with suitable examples. Write and explain rules for well-formed XML document.                                                                                                                                                                                                               | 10    | L2  | 2   | 1   |
| b)         | Design Login Page HTML. The page must have fields in the page Username, Password, Remember Me, and a Login button.                                                                                                                                                                                                                | 10    | L2  | 2   | 1   |
| 5. a)      | Design a form using HTML and JavaScript to Calculate age from the date (Date of Birth).                                                                                                                                                                                                                                           | 10    | L2  | 2   | 1,2 |
| b)         | Design the XML file in HTML by CSS and XSLT and write a well-formed XML file to store student information.                                                                                                                                                                                                                        | 10    | L2  | 3   | 1,2 |
| 6. a)      | What is CSS? Explain the types of CSS.                                                                                                                                                                                                                                                                                            | 10    | L1  | 3   | 1,2 |
| b)         | Differentiate between Client-Side Scripting and Server Side Scripting. Explain the procedure for validating the XML Documents.                                                                                                                                                                                                    | 10    | L2  | 3   | 1,2 |
| Unit – III |                                                                                                                                                                                                                                                                                                                                   |       |     |     |     |
| 7. a)      | Design a Email Address Generator web page and what happens after the user enters first and last names and what happens after the user clicks the Generate Email button.                                                                                                                                                           | 10    | L3  | 4   | 1,2 |
| b)         | Explain JSX. Write a HTML in React first uses JSX and the second does not uses JSX.                                                                                                                                                                                                                                               | 10    | L2  | 4   | 1,2 |
| 8. a)      | What is the difference between the ES6 and ES5 standards? How do you create a React app?                                                                                                                                                                                                                                          | 10    | L1  | 5   | 1   |
| b)         | What if the JSON output is identical to the issues array? What are the differences? How do you think this will affect the client?                                                                                                                                                                                                 | 10    | L1  | 5   | 1   |
