

NMAM INSTITUTE OF TECHNOLOGY, NITTE
Off-Campus Centre of Nitte (Deemed to be University)
Second Semester M.C.A. (CBCS) Degree Examinations

May - June 2024

22MCA205 – PROFESSIONAL COMMUNICATION

Duration: 3 Hours

Max. Marks: 100

Note: Answer Five full questions choosing Two full questions from Unit – I & Unit – II each and One full question from Unit – III.

Unit – I

	Marks	BT*	CO*	PO*
1. a) Discuss the characteristics of effective communication.	5	L*2	1	9,10,12
b) Describe the basic flow of communication.	5	L2	1	9,10,12
c) List some common barriers to effective communication.	5	L1	1	9,10,12
d) Explain the difference between Verbal and non- verbal communication.	5	L1	1	9,10,12
2. a) List the different types of organizational communication.	5	L1	1	9,10,12
b) How do interpersonal barriers affect communication, and what are some examples of these barriers?	5	L2	1	9,10,12
c) How does feedback contribute to improving communication effectiveness within teams?	5	L2	1	9,10,12
d) Explain why encoding and decoding are essential processes in the communication cycle.	5	L2	1	9,10,12
3. a) What are some basic steps involved in preparing for a presentation?	5	L1	2	9,10,12
b) Explain why do presenters need to fully understand the capabilities and limitations of the technology they plan to use in their presentations?	5	L2	2	9,10,12
c) What are some effective techniques for maintaining audience engagement throughout a presentation?	5	L1	2	9,10,12
d) Discuss the nuances of delivery in presentation.	5	L1	2	9,10,12

Unit – II

4. a) Do as directed:	10	L2	2	9,10,12
-----------------------	----	----	---	---------

Rewrite using suitable prepositions:

- i) I live _____ Bengaluru.
- ii) There is a stain _____ my shirt.
- iii) The party is _____ Nandini 's house.

Rewrite using suitable articles:

- iv) I had a meeting with _____ MLA. (a, an)
- v) He bought _____ car last week. (a, an, the)
- vi) I saw _____ movie that you recommended last night. (a, an, the)

Give suitable question tags:

- vii) He will not be upset, _____?
- viii) He can speak French, _____?

Rewrite the proper form of the verbs given:

- ix) We _____(go) to the beach last weekend.
 - x) She _____ a book. (be+read)
- | | | | | |
|---|---|----|---|---------|
| b) Define the terms "listening" and "hearing". How would you differentiate between listening and hearing? | 5 | L1 | 2 | 9,10,12 |
| c) Write an email to your principal marking a copy to your HOD seeking permission to volunteer at a community service event during college hours. | 5 | L2 | 2 | 9,10,12 |

5. a) Read the passage and answer the questions below:

Deepfake AI is a type of artificial intelligence used to create convincing images, audio, and video hoaxes. It's a blend of deep learning and fake, encompassing both the technology and the resulting counterfeit content. These creations often involve the substitution of one person's likeness for another or the fabrication of entirely new scenarios and actions.

The primary peril of deepfakes lies in their capacity to disseminate misleading information that appears authentic, potentially originating from reliable sources. An illustrative instance occurred in 2022 when a deepfake video surfaced portraying Ukrainian President Volodymyr Zelenskyy purportedly urging his troops to capitulate, raising concerns about the manipulation of public perception.

Moreover, apprehensions have arisen regarding their potential exploitation in election interference and propaganda campaigns. Despite these ominous implications, deepfakes harbor legitimate applications, such as enhancing video game experiences, facilitating customer service interactions, and augmenting entertainment endeavors.

The mechanics of deepfakes hinge on two fundamental algorithms: a generator and a discriminator. These components collaborate within a generative adversarial network (GAN) to produce and refine synthetic content. By iteratively generating and assessing the realism of content, deepfake algorithms progressively enhance their proficiency at fabricating convincing simulations.

Deepfake videos materialize through various methodologies. They may either manipulate an original source video to portray individuals in unreal scenarios or employ face-swapping techniques to transplant one person's visage onto another's. Techniques like lip syncing and audio replication further bolster the illusion, leveraging recurrent neural networks to synchronize speech with visuals.

The advent of deepfakes owes much to the development and refinement of key technologies. GAN neural networks serve as the backbone of deepfake creation, supported by convolutional neural networks for visual pattern recognition and autoencoders for attribute imposition. Additionally, advancements in natural language processing and high-performance computing contribute to the evolution of deepfake capabilities.

Despite their wide-ranging applications, deepfakes carry substantial risks, including the perpetration of fraud, dissemination of misinformation, and erosion of trust in media. To combat these threats, concerted efforts are underway to develop detection mechanisms and deploy protective measures across various sectors and platforms.

1. What is deepfake AI primarily used for?
 - a) Enhancing security systems
 - b) Creating realistic images, audio, and video forgeries
 - c) Analyzing consumer behavior
 - d) Generating authentic news articles
2. Which real-world example is cited in the passage to highlight the danger of deepfake videos?
 - a) A video demonstrating the effectiveness of customer service interactions
 - b) A video featuring a celebrity endorsing a product
 - c) A video falsely depicting Ukrainian President Volodymyr Zelenskyy issuing a surrender order
 - d) A video showcasing advancements in high-performance computing

3. What is a fundamental concern associated with deepfakes, as mentioned in the passage?

- a) Their potential to enhance entertainment experiences
- b) Their ability to generate authentic news content
- c) Their capacity to spread false information that appears genuine
- d) Their contribution to the improvement of customer support services

4. How do the mechanics of deepfakes operate?

- a) Through the collaboration of a generator and a transmitter
- b) Through the manipulation of tangible objects
- c) Through the use of a single algorithm
- d) Through the collaboration of a generator and a discriminator within a GAN

5. What technological advancements have contributed to the development of deepfakes?

- a) Decline in computing power
- b) Reduction in data availability
- c) Improvements in natural language processing and high-performance computing
- d) Decrease in convolutional neural networks' capabilities.

10 L2 3 9,10

b) Compose an email to your professor seeking guidance on a research topic, with a copy sent to a fellow student who collaborated with you on the initial brainstorming.

10 L2 3 9,10

6. a) Draft a job application letter along with your updated resume for the role of Graphic Designer advertised by Creative Designs Inc. The advertisement mentions a requirement of proficiency in Adobe Creative Suite and a minimum of 2 years of experience. Submit your application to hr@creativedesignsinc.com by June 5, 2024.

10 L2 3 9,10

b) Write a note of Email etiquette.

5 L2 3 9,10

c) Write a note on the four quadrants of the Johari Window model.

5 L2 3 9,10

Unit – III

7. a) Elaborate on Intellectual Property Rights (IPR).

5 L2 4 9,10

b) Describe the basic principles of workplace ethics.

5 L2 4 9,10

c) How does stress affect different aspects of one's life, including physical health, mental well-being, and productivity?

5 L2 4 9,10

d) What are the typical consequences of poor time management in a professional setting?

5 L3 4 9,10

8. a) Give a summary of the four main types of intellectual property rights.

5 L1 4 9,10

b) Explore the value of time management skills in both personal and professional contexts.

5 L3 4 9,10

c) Recall the four key strategies for decision making known as the 4 Ds?

5 L1 4 9,10

d) Outline the social and environmental obligations that come with being a software professional?

5 L1 4 9,10

BT* Bloom's Taxonomy, L* Level; CO* Course Outcome; PO* Program Outcome
